OBJECTIVE

Software Developer with hands-on experience in building scalable web applications, ITSM modules, and full-stack features using React.js, Redux Toolkit, Java Spring Boot, and SQL databases. Skilled in API development, UI engineering, debugging, and agile workflows. Seeking a full-time Software Engineer / Full Stack role to contribute to high-impact engineering teams.

TECHNICAL SKILLS

Programming	Java, JavaScript, Java, HTML, CSS
Frontend	React.js , Redux Toolkit, React Hook Form, Axios, Tailwind CSS, Styled-Components
Backend	Spring Boot , REST APIs, PostgreSQL, MySQL
Tools	Postman, Jira, Git, GitHub, pgAdmin, AWS (basic), Microsoft Office
Other Skills	Debugging, Agile/Scrum, SQL Querying, Component-based UI Architecture

EXPERIENCE

Aiprus Software Pvt. Ltd — Associate Software Developer Intern Jun 2025–Present *Full Stack Developer – ITSM (React.js + Spring Boot)*

- Developed a full ServiceNow-style **ITSM platform** covering Incident, Service Request, Problem, Change, Release, Knowledge, and SLA modules using React.js and Spring Boot.
- Built dynamic UI screens—forms, dashboards, approval flows, related records, worknotes, and ticket lifecycle views—using **React.js, Redux Toolkit, Tailwind CSS**.
- Implemented backend microservices for ticket creation, assignment, SLA tracking, and resolution processes using **Spring Boot, JPA, PostgreSQL**.
- Developed **Incident Management** with priority/urgency (P1–P4), attachment uploads, linked tickets (problem/change/incident), tasks, and resolution workflows.
- Created **Service Request Management** with approval routing, service catalogs, assignment groups, and automated state transitions.
- Built **Problem Management** (RCA, workaround documentation, incident linking) and **Change Management** including CAB approvals, scheduling, release mapping, and change lifecycle automation.
- Implemented **JWT authentication + RBAC** enabling secure access for Admin, Agent, and End Users across all ITSM modules.
- Added **Knowledge Management** with searchable articles, categorization, and ticket-to-article referencing to improve resolution speed.
- Implemented **SLA timers, breach detection, and audit logs** for Incident and SR modules, improving workflow compliance.
- Worked extensively with **Bitbucket**: committed code, created branches, raised PRs, resolved merge conflicts, added reviewers, and performed code reviews.
- Supported deployment processes including **CI/CD pipelines**, versioning, server updates, and production deployment on **AWS EC2 (Ubuntu) with Nginx**.

Code Aspire

Software Developer Intern

Feb 2025 – May 2025

Gurugram, India

- Built reusable UI components using **React.js** and **Styled-Components**.

- Implemented dynamic routing, state management (Redux Toolkit), and responsive layouts.
- Debugged UI issues, optimized rendering, and improved cross-browser compatibility.
- Enhanced UI/UX consistency across modules based on feedback.

PROJECTS

Enterprise ITSM Platform (Incident, Service Request, Problem, Change, Knowledge)

Developed a complete IT Service Management platform covering incident tracking, service requests, problem resolution, changes, SLAs, releases, and knowledge management.

- Created **Service Request Management** allowing users to request services (access, hardware, software) with dynamic forms, approvals, and status workflows.
- Built **Incident Management** enabling ticket creation with priority, impact, urgency (P1–P4), and support for image/file attachments.
- Added related-entity linking: **Problems, Changes, Incidents, Tasks, Worknotes, Resolution Info, and SLA tracking.**
- Implemented **Problem Management** for root cause analysis, workaround documentation, and incident linkage.
- Developed full **Change Management** including Standard, Normal, Emergency changes with approval flows, **CAB approvals**, scheduling, and automated status updates.
- Integrated **Release Management** enabling grouping of changes into deployable releases with scheduling and version tracking.
- Built **Knowledge Management** feature allowing agents to create, categorize, and reference knowledge articles from incidents/problems.
- Implemented secure authentication using **JWT**, enabling role-based access for Admin, Agent, and End Users.
- Created dashboards and dynamic forms using **React.js**, integrating REST APIs for real-time updates.

Tech: **React.js, Spring Boot, PostgreSQL**, REST APIs, JWT, Redux Toolkit, Tailwind CSS.

Skills Assessment Platform

A full recruitment assessment system enabling companies to automate candidate evaluation, identity verification, and coding test execution.

- Built dynamic Test Builder supporting MCQ, True/False, Multiple Choice, Descriptive, and Coding questions.
- Integrated **Judge0 API** for real-time execution of Java, JavaScript, Python, and C code.
- Implemented full candidate workflow: job posting → application → verification → test link → exam → scoring → result.
- Developed recruiter dashboards using **React.js** with optimized API interactions and state management.
- Built backend services using **Spring Boot + JPA** for authentication, scoring, reporting, and test management.
- Documented APIs using **Swagger** and supported CI/CD deployments on AWS (EC2 + Nginx).

Tech: **React.js, Spring Boot, PostgreSQL, Judge0, Swagger, AWS.**
