Summary

Software Engineer with 3.5+ years of experience in Java, Spring Boot, Microservices, REST APIs, caching, messaging queues, and distributed systems. Strong in debugging, performance tuning, API optimization, and building scalable backend systems. Hands-on with event-driven architectures, cloud deployments, and production support.

Skills

Languages: Java, Python, SQL
Frameworks: Spring Boot, Spring MVC, Hibernate, JPA
Architecture: Microservices, Event-Driven Design, Distributed Systems
Databases: MySQL, PostgreSQL, MongoDB, Oracle
Messaging: Kafka, RabbitMQ, AWS SQS
Caching/Search: Redis, Elasticsearch
DevOps: Docker, Kubernetes, Jenkins, Git, GitHub Actions, GitLab, Terraform
Monitoring: NewRelic, Kibana, Grafana, Elastic
Other: REST APIs, CI/CD, Linux, Agile, System Design

Experience

Software Engineer — Aiprus Software Ltd, Gurgaon

May 2025 – Present

- Designed and implemented Redis caching strategies reducing API latency by 60%.
- Implemented Kafka-based event-driven communication across microservices.
- Built and enhanced microservices including orchestration and inter-service communication.
- Refactored high-traffic APIs enhancing throughput, scalability, and fault tolerance.
- Developed modules for license management, time tracking, reporting, and productivity tools.
- Conducted code reviews, mentored juniors, and enforced engineering best practices.
- Collaborated with PMs, QA, DevOps, and frontend teams to deliver complete solutions.

Associate Consultant — Snap-On Business Solutions, Noida

Oct 2024 – May 2025

- Worked on EPC platform used by Ford, Suzuki, Mercedes, Kia, GM, PMPro, and John Deere.
- Developed backend microservices and migrated legacy modules to modern architectures.
- Resolved production issues and fixed major performance bottlenecks.
- Improved maintainability via workflow modularization and simplified code design.
- Ensured quality delivery through JUnit-based test coverage.
- Conducted knowledge-sharing sessions and internal code walkthroughs.

Software Engineer — To The New, Noida

Jul 2022 – Oct 2024

- Contributed to OLX, VideoReady OTT, Tata Play MDU, and Eurokids LMS backend systems.
- Achieved 40% performance boost through API optimization and DB indexing.
- Developed auditing services, dashboards, and reusable backend components.
- Implemented REST APIs, integrations, and event-driven workflows.
- Owned Tata Play backend: resolved critical bugs and delivered new features.
- Performed code reviews, wrote unit/integration tests, and supported deployments.

Software Engineer Trainee — To The New

Feb 2022 – Jul 2022

- Trained in Java, Spring Boot, backend fundamentals, and SQL databases.
- Assisted in backend development, testing, and production support tasks.

Education

B.Tech in Computer Science, ABESIT
Class 12, Hansraj Smarak Sr. Sec School

2018–2022 (7.2 CGPA)
2018 (72%)
